## **XSTREMEMD RECEIVES SUPPLIER RECOGNITION AWARD FROM CONOCOPHILLIPS**

**LOCATION** – XstremeMD was recently recognized by ConocoPhillips as part of its Supplier Recognition Award program. The award honors companies that exhibit exceptional leadership that supports the long-term health of the company, the environment and the communities where ConocoPhillips operates.

XstremeMD received the “Safety” award for establishing telemedicine capabilities in the Eagle Ford to provide full-service occupational medicine to ConocoPhillips employees and business partners working in this rapidly developing, remote onshore area. Previously, the nearest facility was more than an hour away. Since implementation, response time between incidents and treatment has been reduced significantly, further diminishing severity and recovery time. These emergency and non-emergency service offerings, including x-rays, pulmonary function tests and prescriptions, are improving health and safety in this key operating area. The implementation was so successful other operators and contractors are utilizing the venture, significantly reducing the cost to ConocoPhillips. This model is now being applied in other ConocoPhillips Lower 48 operating areas.

Recipient companies were nominated by ConocoPhillips’ global business unit leadership, with winners chosen by a global cross-functional committee, including senior management. XstremeMD was nominated by the Lower 48 Gulf Coast business unit.

“In medicine, we have narrow windows of opportunity to make a significant difference in patient outcomes,” said Dr. Joseph Pearson, president, XstremeMD. “Often times, even in the urban setting, these windows close prior to patients ever reaching us in the emergency department. ConocoPhillips provided us with our first opportunity to provide our full suite of services to those working in the remote Eagle Ford Shale. We thank ConocoPhillips for recognizing our efforts and the positive impact we’ve had in this area.”

### **About XstremeMD**

XstremeMD has rapidly become North America’s premier remote health care provider for the oil and gas industry. Their innovative approach has led to customer affordability and the development of new standards in remote health care. XstremeMD has never lost a customer and their annual sales volume has doubled every year since 2009. They employ more than 100 employees across North America’s oil and gas fields and have an expanding global presence as well. Recently, they opened their sixth remote mobile medical unit within North America’s shale plays and have contributed to several remote health care publications. Most importantly, XstremeMD’s services have saved numerous lives which would have otherwise been lost had it not been for their services.
